Name: _____

1

Mia counts twenty-two bright red blocks for her toy bridge.

2

Ben builds 36 with blue tens and sunny yellow ones.

3

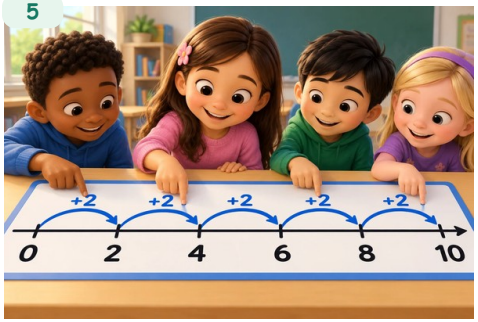

Peter packs forty-five shiny counters into groups of ten.

4

Luna builds 72 with base-ten blocks for a pretend space station.

5

Aaliyah and her friends trace jumps of two along a number line.

6

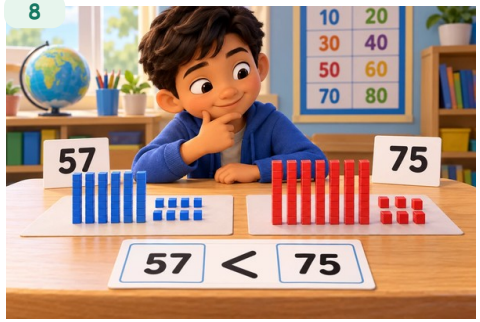

Oliver counts backward by tens from one hundred on his space trail.

7

Zara builds 84 with eight tens and four ones on a train mat.

8

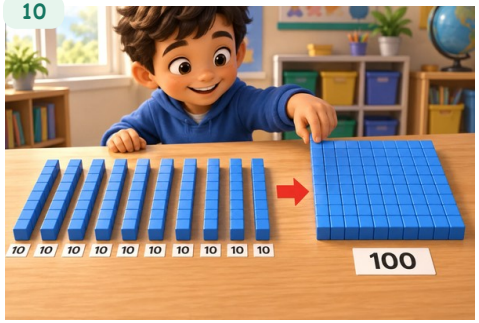

Mateo compares 57 and 75 before choosing the greater number.

9

Priya slides five number cards into order for a number parade.

10

Jackson joins ten rods of ten to build one hundred.

11

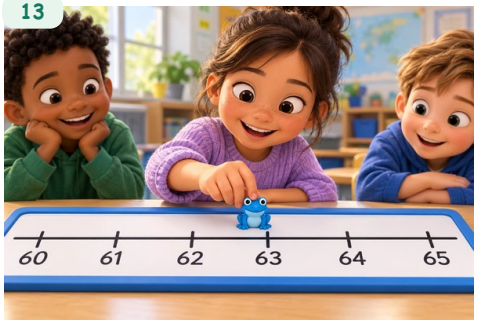

Amara estimates how many colourful cubes fill the glass jar.

12

Amara counts the bright cubes carefully to check her estimate.

13

Sofia slides her little frog to 63 on the number line.

14

Noah builds different place-value block models for his pretend city.

15

Isabella hops by fives along a sunny number path.

16

Kai flips number cards while counting by twenty-fives.

17

Fatima points to the tens column on her place-value chart for 128.

18

Henry builds 146 with hundreds, tens, and ones on a rocket mat.

19

Chloe compares 132 and 123 to find the greater three-digit number.

20

Amir lines up number cards to 200 for a classroom train.

21

Ruby sorts bright buttons into small counting groups.

22

Lucas builds sixteen as two equal groups of eight shiny counters.

23

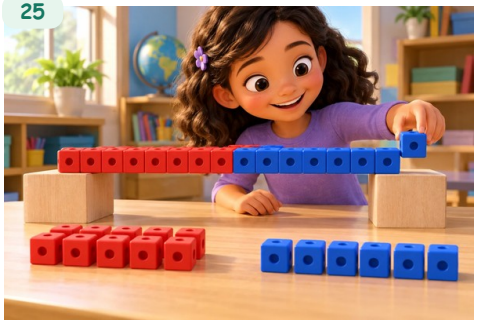

Hannah compares a round fraction model with a paper strip.

24

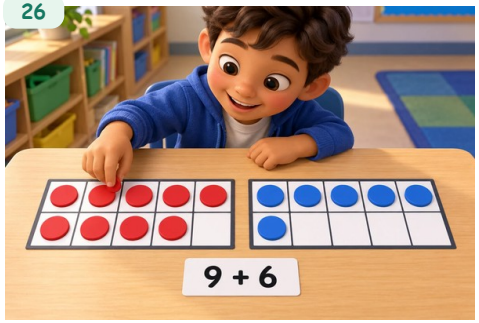

Isaac splits a rectangle into four equal parts for a flag.

25

Zoe joins eight red blocks and seven blue blocks to build a bridge.

26

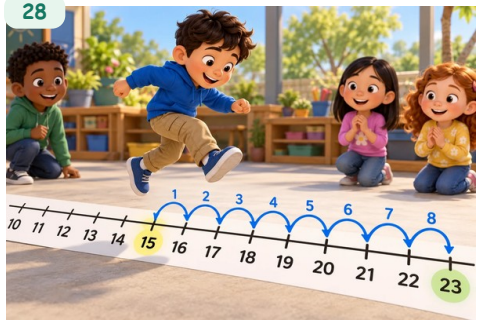

Caleb fills two ten-frames to solve nine plus six.

27

Aria makes a group of ten before adding the spare counters.

28

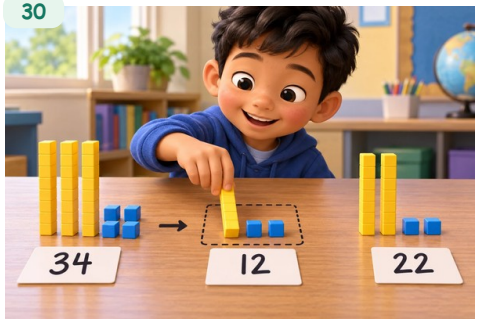

David jumps forward eight spaces from fifteen on a giant number line.

29

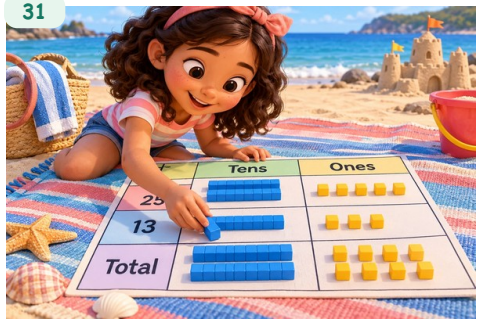

Nia removes six red counters from a group of twenty.

30

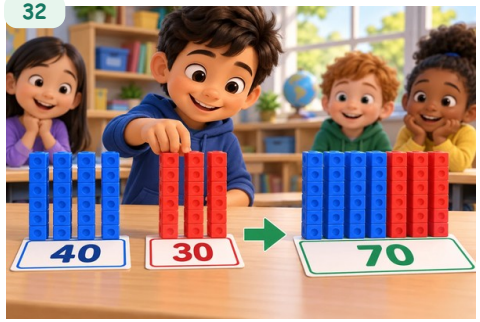

Aiden uses base-ten blocks to take twelve away from thirty-four.

31

Bella adds 25 and 13 with tens and ones on a beach mat.

32

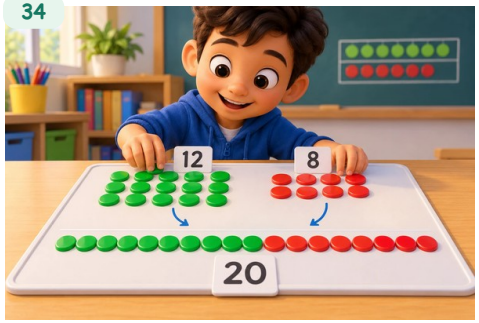

Mason joins forty and thirty to make seventy bright blocks.

33

Isla solves a number puzzle by adding seven to eighteen.

34

Adam joins twelve green counters and eight red counters to make twenty.

35

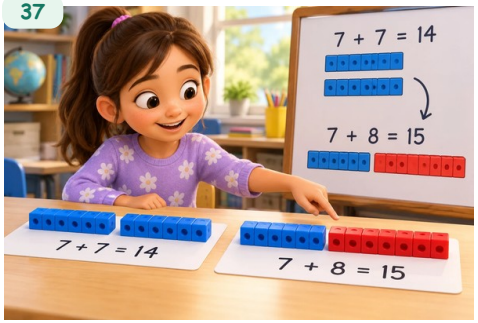

Nora finds two number cards that work together to make fifty.

36

Ryan doubles seven toy sheep to find fourteen altogether.

37

Sarah uses seven plus seven to help solve seven plus eight.

38

Alex builds three equal groups of five blue bridge blocks.

39

Emily places counters in three neat rows of four.

40

Nathan counts the bright cubes arranged in straight rows.

41

Jasmine packs sixty blocks into six groups of ten.

42

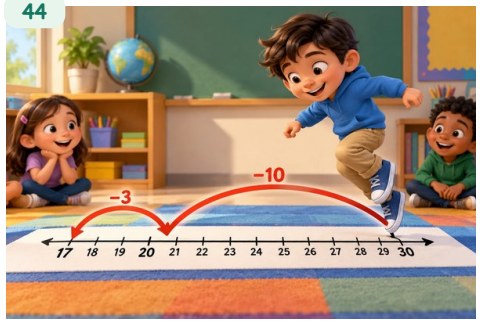

Owen shows that ninety is ten less than one hundred.

43

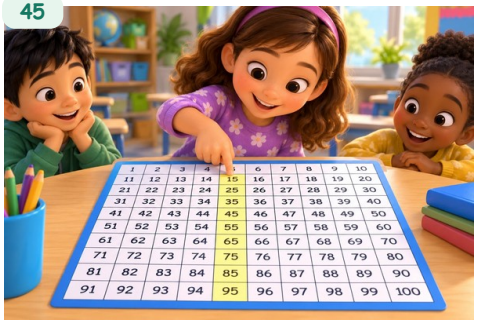

Layla finds the difference between 42 and 28 on a score board.

44

Daniel makes backward jumps to subtract thirteen on a number line.

45

Amelia follows the tens pattern down a bright hundreds chart.

46

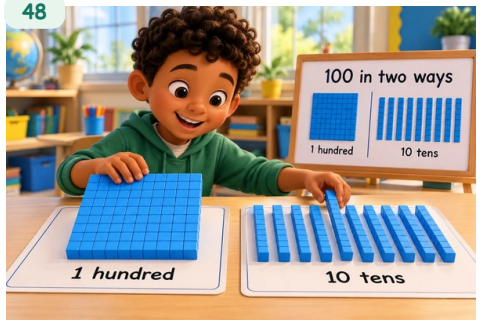

Sebastian writes three different addition sentences that each make twenty.

47

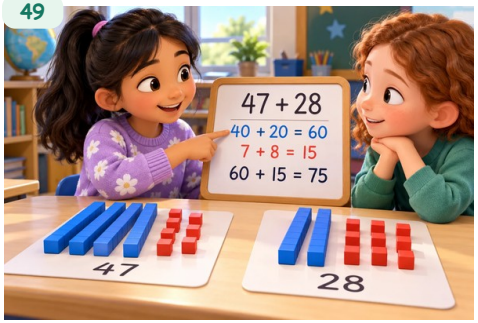

Anika checks two counter groups before explaining her addition answer.

48

Elijah builds one hundred in two ways for a block display.

49

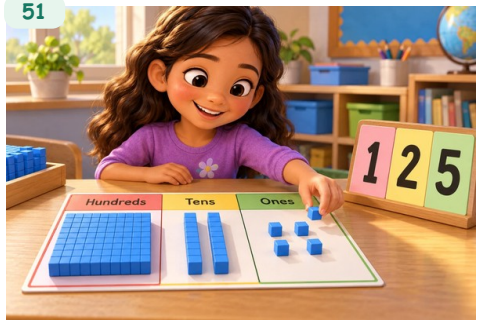

Maya explains her two-digit addition strategy to a friend.

50

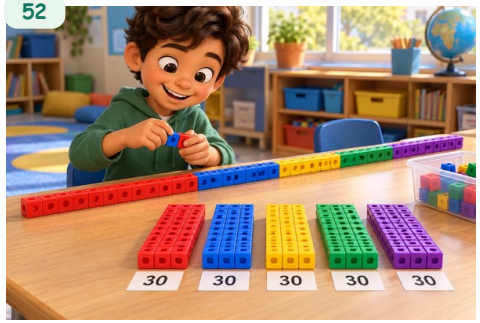

Leo uses blocks to prove that his answer works.

51

Gabriela builds 125 with one hundred, two tens, and five ones.

52

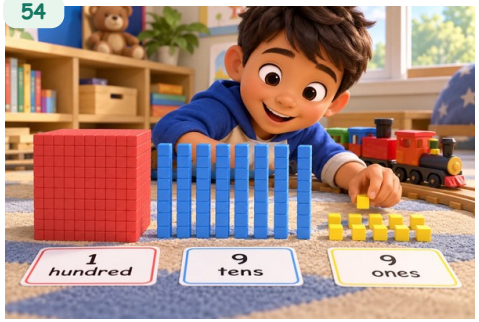

Enzo clicks 150 linking cubes together for a long classroom chain.

53

Melissa places a kite marker at 175 on a number line.

54

Bryan builds 199 with hundreds, tens, and ones beside his toy train.

55

Grace moves her green frog ten more spaces from 86 to 96.

56

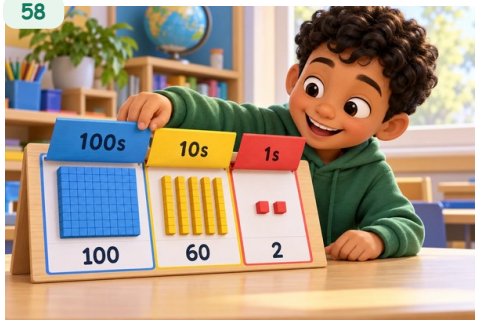

Leonardo steps back ten from 140 on a giant number track.

57

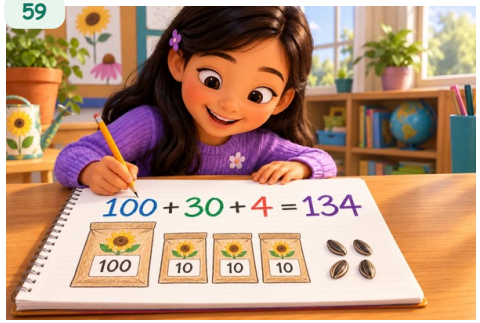

Micaella compares three block models to find the greatest number.

58

Iliya opens place-value flaps to show 162 in expanded form.

59

Ava sketches 134 garden seeds in easy counting groups.

60

Christian counts backward by fives from eighty on a snowy trail.

61

Ashleen spots the empty tens column on her place-value mat for 107.

62

Veronica joins two hundred-flats to build 200.

63

Leah parks nine tens on her mat to make ninety.

64

Paige finds the missing stepping stone between 148 and 150.

65

Luka makes jumps of twenty to reach one hundred.

66

Arya makes equal groups of colourful counters for a class game.

67

Anastasiia shares eight counters fairly between two friends.

68

Davyd packs twelve blocks into three equal toy boxes.

69

Amy shades one-fourth of a square flag for her castle.

70

Marcus compares half and quarter strips to see the equal parts.

71

Mia shares ten strawberries equally, with five on each plate.

72

Ben shares twelve toy cars equally between two little garages.

73

Peter jumps along a number line to add eighteen and seven.

74

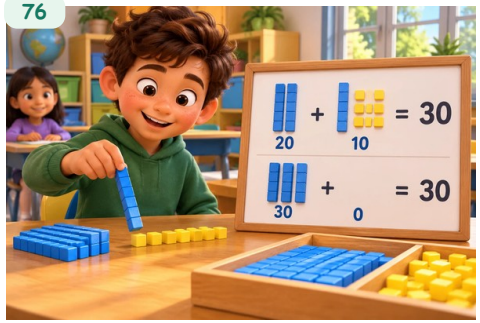

Luna takes nine blocks from a tower of twenty-five.

75

Aaliyah fills ten-frames to add thirteen blue counters and eight red counters.

76

Oliver finds two addition sentences that each make thirty.

77

Zara finds the missing addend on her train-shaped number card.

78

Mateo pairs twenty-four counters for a pretend dance.

79

Priya counts six groups of two blocks for six toy houses.

80

Jackson adds equal groups again and again to find the total.

81

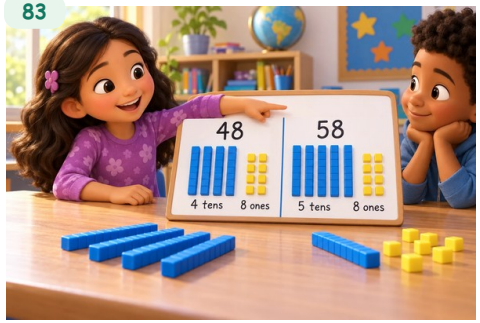

Amara uses a hundreds chart to add twenty to forty-six.

82

Ethan takes ten away from seventy-three on a number track.

83

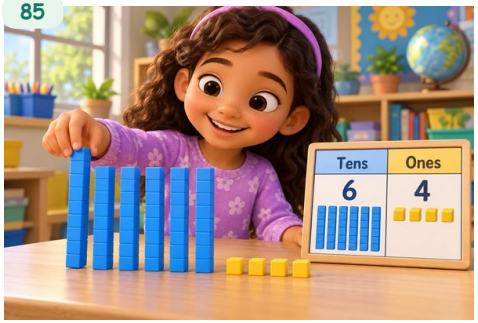

Sofia explains why 58 has one more ten than 48.

84

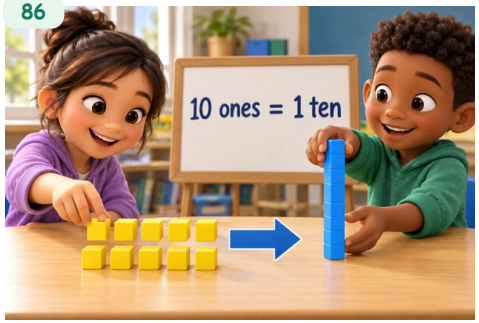

Noah sorts 102, 112, and 121 from least to greatest.

85

Isabella builds 64 with six blue tens and four yellow ones.

86

Kai trades ten tiny ones for one long ten-rod.

87

Fatima estimates how many colourful cubes fill a clear jar.

88

Henry counts the buttons carefully to check his estimate.

89

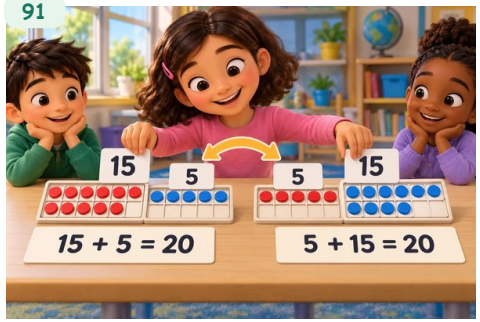

Chloe joins block models of thirty-five and twenty-two.

90

Amir finds two number cards with a difference of ten.

91

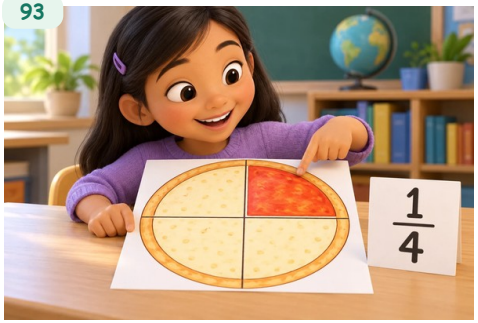

Ruby swaps fifteen and five to show that the sum stays twenty.

92

Lucas walks along a number line from 67 to 80.

93

Hannah colours one equal quarter of her round pizza model.

94

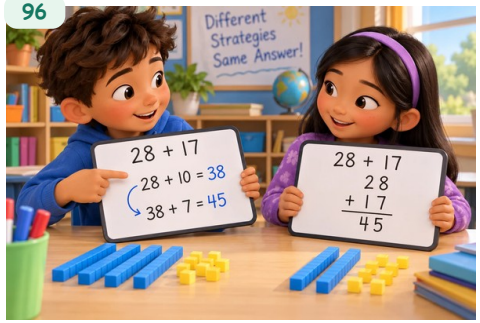

Leah shares twenty red counters equally across four small trays.

95

Zoe writes an addition sentence for eight red and seven blue counters.

96

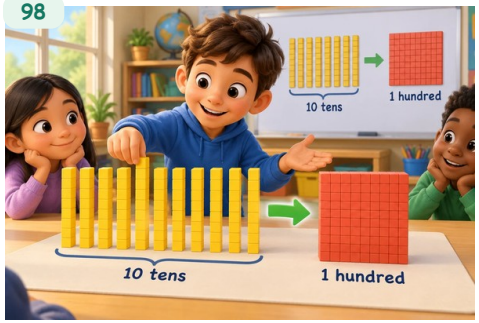

Caleb compares two addition strategies with his classroom partner.

97

Aria draws a picture to solve a subtraction story.

98

David explains how ten tens build one whole hundred.

99

Nia checks whether two groups have the same number of counters.

100

Aiden explains his block model and shares his thinking with friends.

101

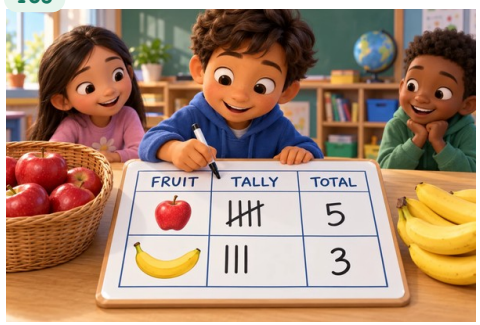

Mia sorts red and blue buttons by colour and shape.

102

Ben surveys his friends to find who likes crunchy apples.

103

Peter records apple and banana votes in a neat tally chart.

104

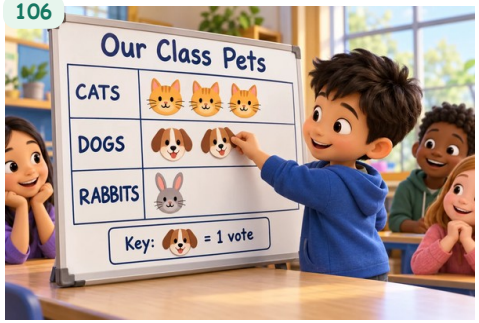

Luna stacks five red blocks to show five votes on a graph.

105

Aaliyah asks her classmates which friendly pet they like best.

106

Oliver adds pet pictures to a pictograph of class votes.

107

Zara counts blue shirts before adding the total to her chart.

108

Mateo sorts shiny toy cars by colour and size.

109

Priya graphs the class votes for three favourite games.

110

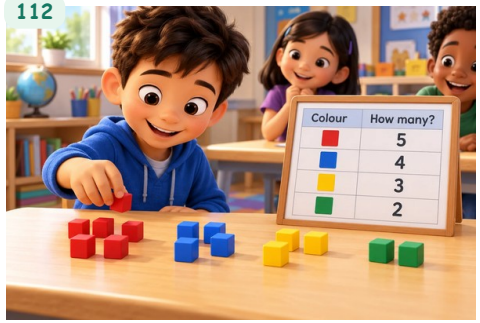

Jackson records how his friends travel to school on a picture chart.

111

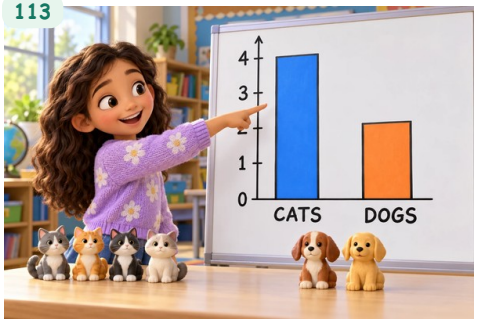

Amara records ten sticker votes in a tally table.

112

Ethan counts how many cubes belong to each colour group.

113

Sofia compares four cat votes and two dog votes on her graph.

114

Noah asks which season his classmates enjoy most.

115

Isabella adds X marks to a line plot about pets.

116

Kai checks the shape and colour of each button before sorting.

117

Fatima asks who brought lunch and records each answer.

118

Henry graphs the favourite games played on the school playground.

119

Chloe places sun and cloud pictures on a five-day weather chart.

120

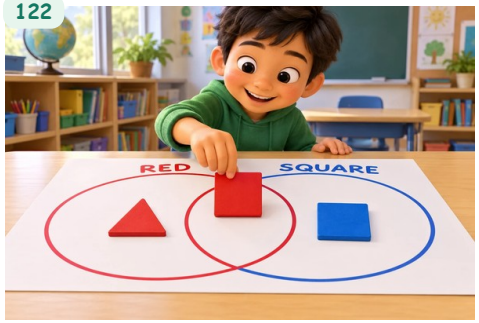

Amir sorts shoe-colour votes into a clear classroom chart.

121

Ruby sorts toy animals and shapes using two sorting rules.

122

Lucas sorts red shapes and squares with overlapping circles.

123

Hannah asks which classmates ride their bicycles to school.

124

Isaac adds a sticker vote beside his favourite animal picture.

125

Zoe points to the tallest bar on the colourful fruit graph.

126

Caleb finds the shortest fruit bars on his class graph.

127

Aria records each red balloon with one careful tally mark.

128

David counts the books his friends read for a reading challenge.

129

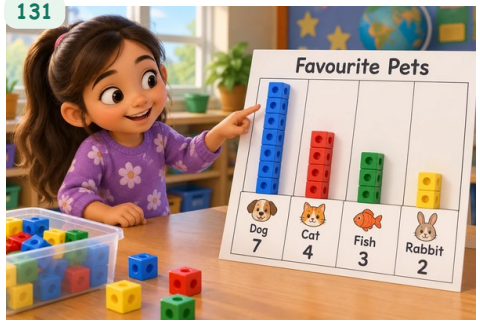

Nia sorts red maple leaves and green oak leaves into trays.

130

Aiden charts the class votes for favourite school subjects.

131

Bella builds block columns to display the class survey results.

132

Mason asks his friends how many siblings they have.

133

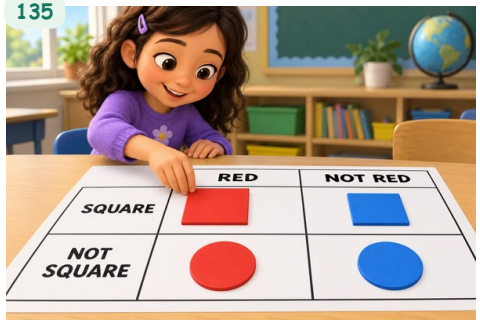

Isla stacks X marks above the matching numbers on a line plot.

134

Adam compares the cat and dog totals in his class survey.

135

Nora sorts red and blue shapes in a Carroll diagram.

136

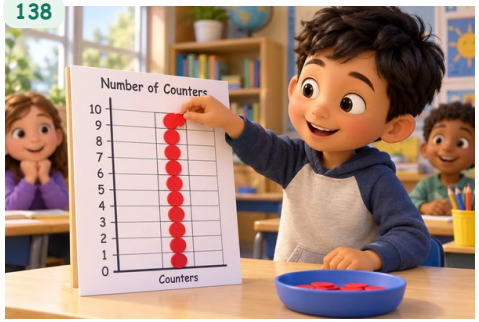

Ryan records how many classmates wear glasses.

137

Sarah graphs the class votes for favourite ice cream flavours.

138

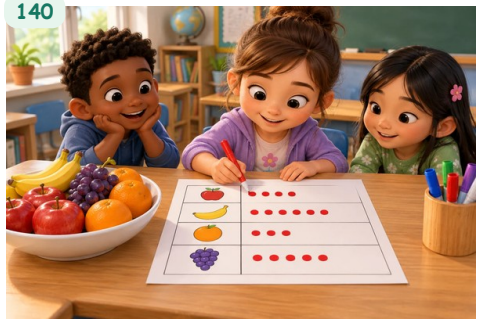

Alex places ten counters on a concrete classroom graph.

139

Emily counts the votes before the class chooses an activity.

140

Nathan records snack choices in a table before comparing the groups.

141

Jasmine draws a separate graph bar for each tasty fruit.

142

Owen compares two groups of bright coloured cubes.

143

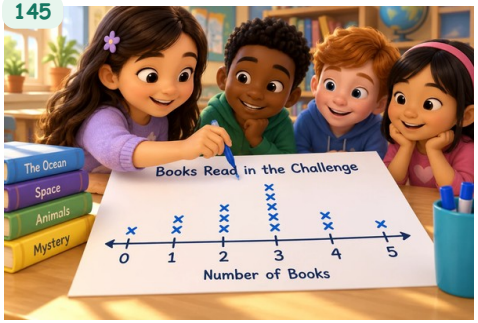

Layla surveys which classmates enjoy playing soccer.

144

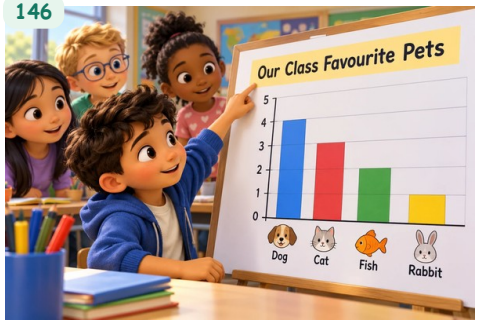

Daniel tallies the playground equipment his friends use most.

145

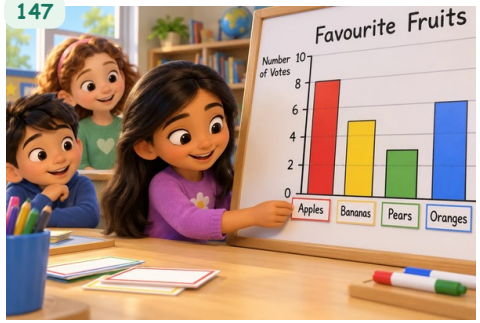

Amelia plots how many books each friend read for the challenge.

146

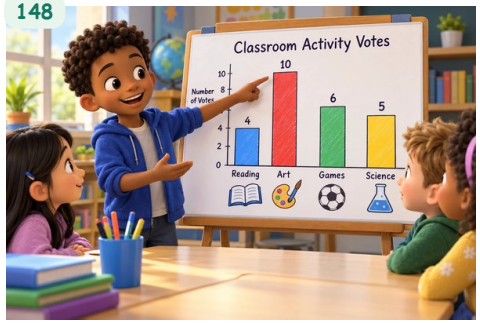

Sebastian checks that the class graph has a clear title.

147

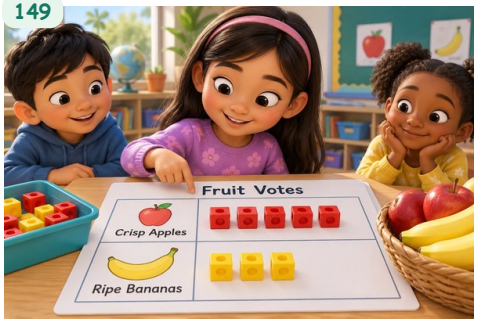

Anika adds clear category labels beneath the graph bars.

148

Elijah explains which classroom activity won the most votes.

149

Maya compares the votes for crisp apples and ripe bananas.

150

Leo and his friends vote to choose a playground game.

151

Gabriela groups toy animals by size and their natural habitats.

152

Enzo uses overlapping circles to connect two shape-sorting rules.

153

Melissa organises coloured shapes in a four-part sorting grid.

154

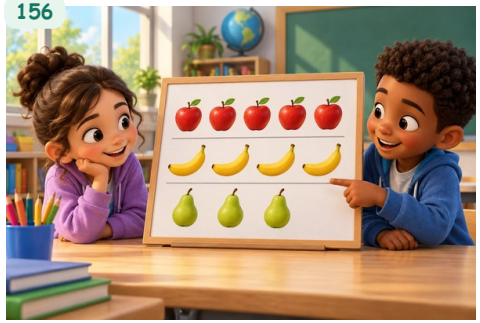

Bryan counts the shapes that have exactly four sides.

155

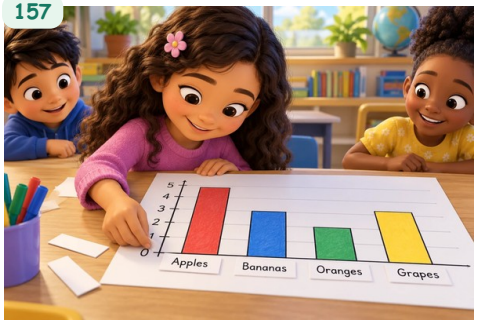

Grace compares three seedlings in one garden bed and five in another.

156

Leonardo compares the picture rows in a fruit pictograph.

157

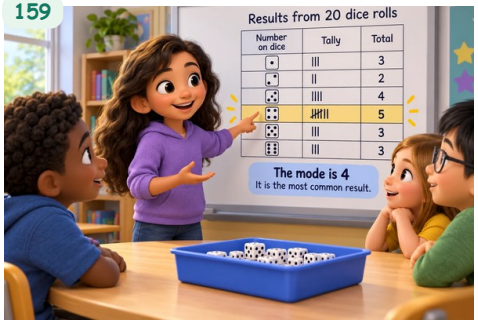

Micaella carefully labels the categories on her bar graph.

158

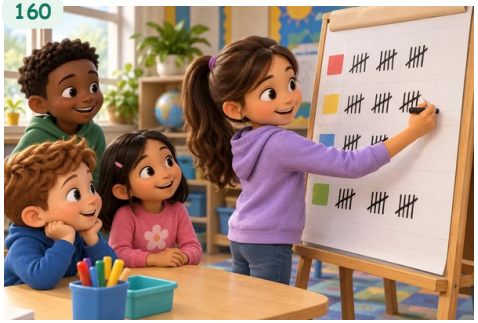

Iliya finds the most common height among the cube towers.

159

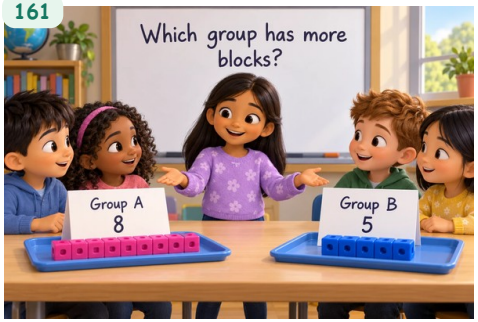

Ava explains why the most common result is called the mode.

160

Christian counts the tally marks for each classroom group.

161

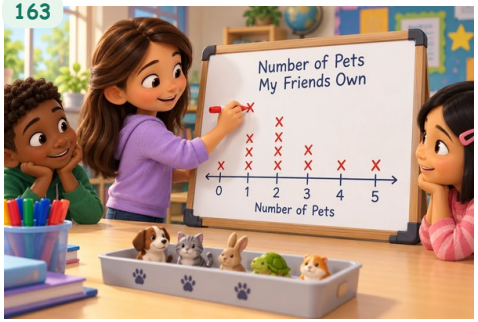

Ashleen asks one question and records the two groups' answers.

162

Veronica charts the fruits her friends choose at snack time.

163

Leah creates a line plot showing how many pets her friends own.

164

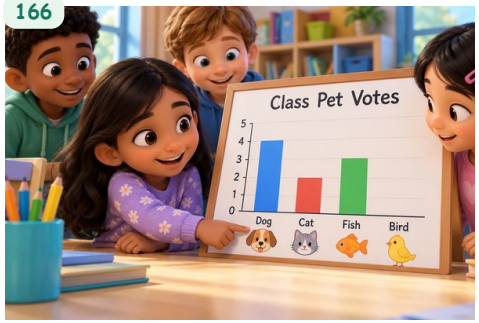

Paige adds one X for each student's result on her line plot.

165

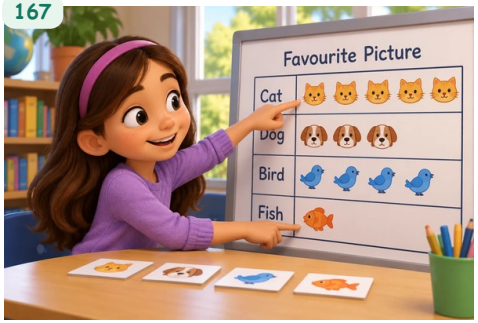

Luka compares two animal categories in a bright pictograph.

166

Arya spots a graph category that received no votes.

167

Anastasiia compares the least popular and most popular picture choices.

168

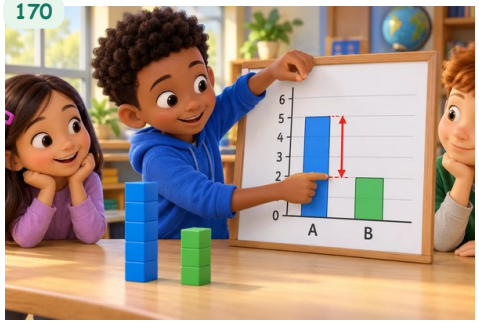

Davyd checks that every class vote appears in the survey chart.

169

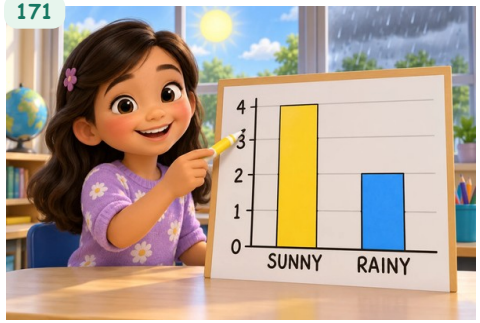

Sarah reads a graph comparing books borrowed by two classes.

170

Marcus finds the difference between two graph bars.

171

Mia graphs four sunny days and two rainy days.

172

Ben predicts red because every counter in the clear bag is red.

173

Peter predicts blue on a spinner that is mostly blue.

174

Luna records ten coin tosses with heads and tails in separate boxes.

175

Aaliyah sorts classroom event cards into likely and unlikely groups.

176

Oliver explains the two possible outcomes of tossing a coin.

177

Zara explains why one standard die cannot roll a seven.

178

Mateo predicts which colour he might draw from the clear counter bag.

179

Priya draws four equal colour sections on a classroom spinner.

180

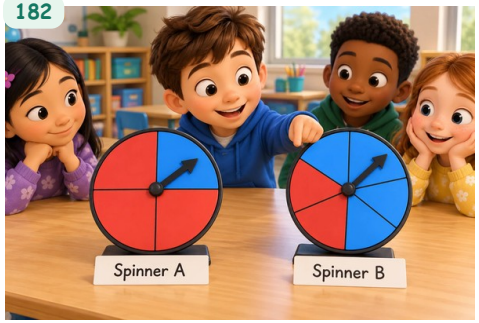

Jackson explains why red is certain on the all-red spinner.

181

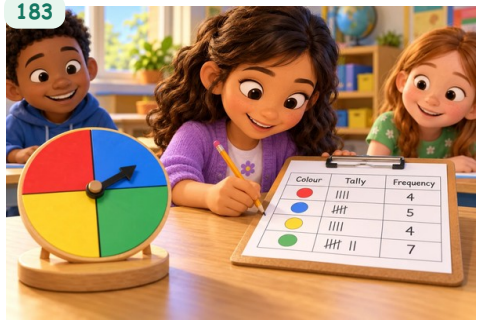

Amara compares red and blue counters in two clear bags.

182

Ethan compares two spinners to predict which gives blue more often.

183

Sofia records twenty spinner results in her experiment table.

184

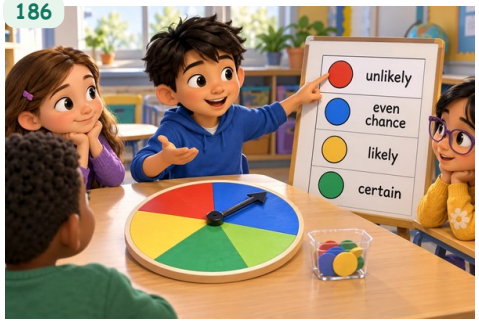

Noah counts the green results from the spinner experiment.

185

Isabella compares her spinner prediction with two sets of results.

186

Kai uses chance words to explain an unlikely classroom game result.

187

Fatima sorts event cards into likely and impossible groups.

188

Henry spins a colourful classroom spinner to test his prediction.

189

Chloe predicts a counter colour before drawing from the bag.

190

Amir explains why each new spin can give a different result.

191

Ruby uses class votes to choose a fair classroom game.

192

Ava finds the most common number in 2, 3, 3, and 5.

193

Hannah asks what the titled class graph reveals about her friends.

194

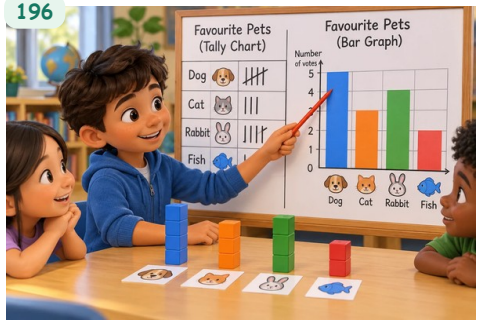

Isaac points to two graph categories with equal totals.

195

Zoe repairs a missing category label on a bar graph.

196

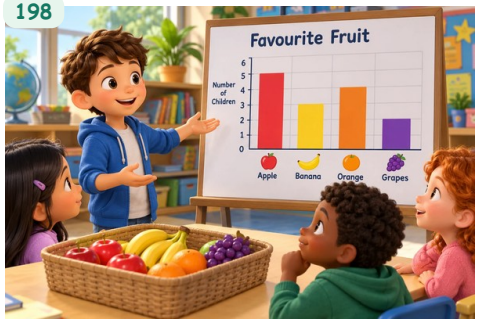

Caleb checks that the graph bars match the tally totals.

197

Aria explains how picture symbols and a key display class data.

198

David asks a classroom question that collected data can answer.

199

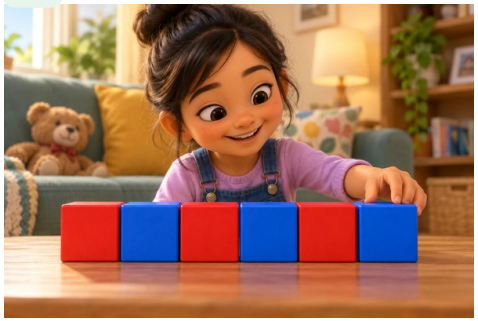

Nia shares what she learned from the class book survey.

200

Aiden presents the class infographic and explains the results.

201

Mia made a red, blue, red, blue pattern with blocks.

202

Ben put a circle after a square in his repeating pattern.

203

Peter used red and yellow cubes to make an AB pattern.

204

Luna added the next three shapes to a repeating pattern.

205

Olivia made a pattern with two blue beads and one red bead.

206

Ethan used triangles and circles to make a pattern.

207

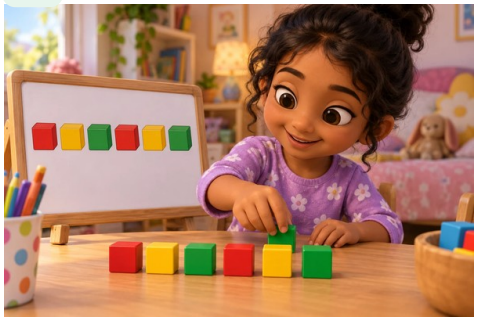

Sofia found the next colour in a repeating pattern.

208

Noah made a clap, tap, clap, tap pattern.

209

Aisha used blocks to copy a pattern from the board.

210

Liam made an AAB pattern with red and green counters.

211

Emma put three different shapes in a repeating pattern.

212

Lucas found the missing colour in a row of beads.

213

Ava made a pattern with big and small circles.

214

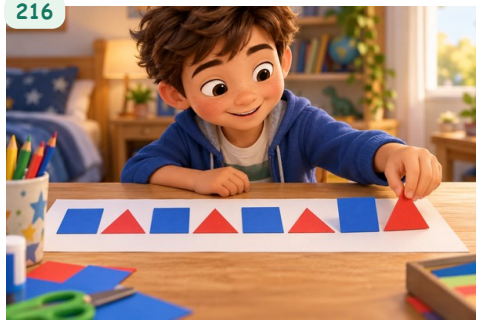

Daniel used two red blocks and one blue block to make a pattern.

215

Grace pointed to the part of the pattern that repeated.

216

Mason continued a pattern with squares and triangles.

217

Chloe made an ABC pattern using three colours.

218

Leo clapped twice and stomped once to make a pattern.

219

Isabella copied a repeating pattern using coloured tiles.

220

Henry found a mistake in a pattern of shapes.

221

Amelia made a repeating pattern with yellow and green cubes.

222

Jackson drew the next three pictures in a repeating pattern.

223

Aria used stars and hearts to make a pattern.

224

William made an ABBA pattern using coloured blocks.

225

Zoe explained what came next in her pattern.

226

Caleb used red, red, blue to make an AAB pattern.

227

Harper found the missing shape in a repeating pattern.

228

Elijah made a pattern using two different sounds.

229

Ruby made a repeating pattern with buttons.

230

Nathan used three colours to make a repeating pattern.

231

Victoria made a pattern with circles, squares, and triangles.

232

Samuel showed his friend where the pattern started again.

233

Hannah used coloured beads to make a necklace pattern.

234

Isaac made a repeating pattern using hand movements.

235

Layla drew a circle, circle, square pattern.

236

Gabriel used counters to continue a repeating pattern.

237

Ella found the part of the pattern that repeated.

238

Oliver made a repeating pattern with toy cars and trucks.

239

Maya explained her repeating pattern to a partner.

240

Benjamin used coloured shapes to make a pattern around a picture.
